WORK EXPERIENCE:

Creesync Technologies (FarziEngineer)

SDE | 06 September, 2021 - Present

- **Farzicom** : One of the Frontend lead for this multitenancy product which is used by many D2C like Plixlife, Safari bags, Genie, Lotus organics, etc.
- Build UI and maintained the frontend code of this product for these clients.
- Build reusable and maintainable components for future use following best practices.
- Collaborate with other developers to migrate this product from **React.js** to **Next.js**, which improved performance in many ways, for ex:- loading heavy data pages instantly.
- Optimized and reduced page load time using **lazy loading** and **imigix**.
- Have used a **data layer** to store users' information for marketing needs.
- Fixed 100+ bugs and done 200+ PR for both - farzicom and its admin panel.
- **Technologies used** - Reactjs, Typescript, Nextjs, SCSS, styled-component, Apollo-graphql, Material UI
